Hi,

Today, Sep 1st, 2021, the unlock worked fine after yesterday it failed weirdly; I reported it on Discord and it was fixed in less than a day so kudos to them. If you need a software developer tester to help remotely occasionally just let me know; I quite enjoyed working on the Nervos platform.

Yesterday's error was most probably connected with the major Nervos Testnet error of 22-23/08/2021.
I did the withdrawal on 24/08/2021 so it took 7 days for the withdrawal to complete.
